EXPERIENCE:

1.8 Year (DDT SOFTWARE PVT LTD)

OBJECTIVE

Dedicated and results-driven Front-End Developer with strong expertise in HTML, CSS, Bootstrap, JavaScript, and jQuery. Seeking to apply my skills in building responsive, visually appealing, and user-centric web interfaces. Eager to contribute to a forward-thinking team where I can enhance user experiences and continue to expand my knowledge in front-end development.

TECHNICAL SKILLS

- Languages & Technologies: **HTML5, CSS3, BOOTSTRAP, JAVASCRIPT, JQUERY, REACT JS**
- API Handling: **Axios, Fetch**
- State Management: **Context API**
- Tools & Platforms: **Git, NPM, Webpack, Chrome DevTools.**

RELEVANT WORK EXPERIENCE

Front End Web Designer JUN 2023 – Present

- Built responsive websites using semantic HTML5, JavaScript, ReactJS, and CSS compiled using Maven and Webpack build tools.
- Debugged and resolved front-end issues to ensure optimal functionality and performance of websites.
- Utilized jQuery for DOM manipulation, event handling, and AJAX requests to create responsive and dynamic interfaces.
- Designed front-end code using HTML, CSS, and JavaScript, to create a responsive web application that works across desktops, tablets, and 10+ other devices.
- Implemented interactive features using JavaScript and jQuery to enhance user experience.
- Assisted in the development of client-side applications, working closely with senior developers to implement design specifications.

Junior Front End Developer React.js

- Integrated APIs to fetch and display dynamic content, improving site functionality and user engagement.

- Developed and maintained single-page applications (SPAs) using React.js, ensuring high performance and responsiveness.
- Integrated third-party APIs and handled JSON data to dynamically populate application content and improve user interaction.
- Worked on improving the performance of existing web applications by optimising API calls.
- Assisted in developing e-commerce features such as shopping carts, wish lists, and product filters using React.js.
- Developed responsive web applications using React.js, focusing on component-based architecture and prop management.

PROJECTS

Project 1: Responsive E-commerce Website And More

- Designed and developed a fully functional eCommerce website that supports a wide range of products and categories.
- Employed Bootstrap to create a responsive layout that adapts to different screen sizes, ensuring a consistent user experience on mobile and desktop devices.
- Added interactive elements such as image sliders, product filters, and an AJAX-powered shopping cart to enhance user engagement.
- Successfully launched the website within the project deadline, resulting in positive feedback from users and stakeholders.

Project 2: React.js: E-commerce Website

- Developed and maintained a fully functional e-commerce website using React.js, implementing modern design principles and ensuring a seamless user experience.
- Designed and developed a fully functional eCommerce website that supports a wide range of products and categories.
- Utilized state management (React Context/Redux) to efficiently manage the application's state and enhance performance.
- Optimized components and code for performance, leading to faster load times and a more responsive interface.
- Fetched and managed product data from external APIs using JSON, allowing for real-time updates of product listings, availability, and pricing.
- Optimized components and code for performance, leading to faster load times and a more responsive interface.
- Developed and maintained the front-end of the Just Airports website, focusing on creating user-friendly and responsive web pages. Integrated dynamic features such as interactive airport search functionalities and real-time data display for better user experience. Collaborated closely with the design team to ensure the site's aesthetics and usability were aligned with customer needs.

EDUCATION

Graduation: Bachelor of Computer Applications (BCA) — Swami Vivekanand Subharti University Meerut.
